Table 3. Spillovers from advertising: pooling both books

	Plain Ad	Attribute Ad	Estimate	S.E.	p-value
Panel A. Spillovers from price ads:					
Price sorted low-to-high	0.233	0.230	-0.003	0.010	0.757
Price sorted high-to-low	0.034	0.028	-0.005	0.004	0.183
Searched another cheap book	0.514	0.507	-0.006	0.012	0.599
Bought another cheap book	0.420	0.424	0.004	0.011	0.723
Self-reported price importance	3.030	3.041	0.011	0.032	0.720
Panel B. Spillovers from genre ads:					
Filtered to advertised genre	0.017	0.017	0.000	0.003	0.989
Filtered to any genre	0.060	0.070	0.009	0.006	0.106
Searched another book of advertised genre	0.281	0.287	0.006	0.011	0.571
Bought another book of advertised genre	0.199	0.208	0.010	0.009	0.298
Self-reported genre importance	4.011	3.998	-0.013	0.024	0.602

OLS estimates with HC1 robust standard errors.
